INTER
DOOR

DOORS FROM NATURE

We are constantly inspired by nature. We have deep respect for it - it is one of our most important partners. Due to our unique location in the heart of the Tri-City Landscape Park, in beautiful forests near Gdynia, we commune with nature every day, which is a perfect environment for creative work. Such a location also carries a huge responsibility in terms of environmental protection.

We care about sustainable production. In our factories we use only water-based varnishes, we obtain wood only from certified sources, production waste is properly disposed of and recycled. The numerous inspections we undergo guarantee ethical action on our part.

We create inspired by your interior

Durable construction

Our design ensures durability for years. Open our doors, feel their pleasant weight and lightness of use. After many years, they are as beautiful as the day they were purchased.

Personalization

Do you have a bold and original design? We will match it with non-standard and unique doors. Each piece of door is treated individually by us.

A close-up, low-angle shot of a man in a workshop. He is wearing large yellow earplugs and clear safety glasses. He is focused on his work, looking down at a piece of wood on a machine. His hands are positioned on the wood, and the machine's components are visible in the foreground. The background is blurred, showing other parts of the workshop.

INTER
DOOR

We are not a mass producer and we do not want to be. We are more like a large carpentry workshop that fulfills non-standard orders.

The beginnings of Inter Door date back to the 90s, when we completed our first orders. We manufacture interior doors, apartment entrance doors, glass doors, sliding doors, burglar-proof doors and fire-proof doors.

everyday inspiration

The key to the functioning of the Inter Door brand is listening to customers and meeting their most sophisticated expectations. By following global trends and novelties, we try to come up with proposals that are characterized by fresh and original design.

Discover dozens of types of finishes and match your door to your style.

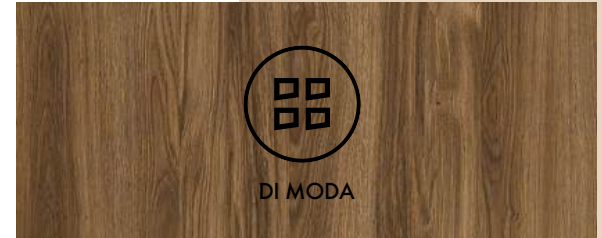

Personalize your doors to suit your taste. With our wide range of finishes, you can create doors that perfectly reflect your unique lifestyle and aesthetic.

CHOOSE FROM

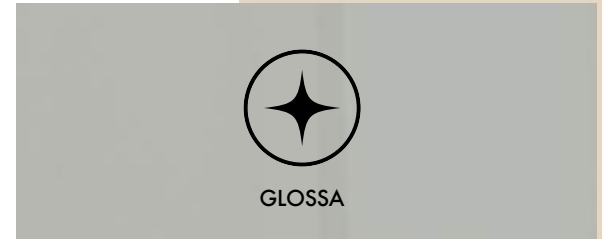

natural veneers from the NATURA collection

matte or wood grain finishes from the DI MODA collection

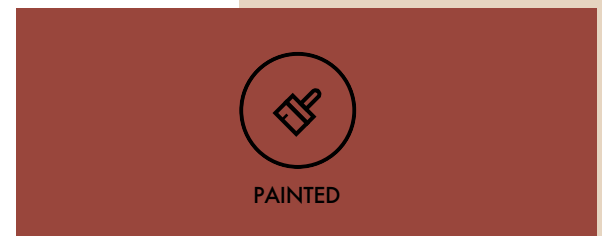

spectacular high-gloss finishes from the GLOSSA collection

durable finishes from the HPL collection

hundreds of colors from the RAL and NCS palette from the PAINTED collection

Match the interior to your vision. See what your doors can be.

Reverse rebate

Non-standard dimensions

Hidden in the wall

Custom finish

Extended panels

REVERSE REBATE 

Reverse rebate doors

You have two doors on one wall. One is to open outwards and the other inwards. To maintain a uniform appearance when closed, use a reverse rebate on the inward-opening door.

 CEILING-HIGH

Non-standard dimensions

All INTER DOOR doors can be made in a non-standard height (selected models up to 3 meters/118 inches and up to 1.1 meters/43 inches wide).

If you use a door frame without a top beam, the door will reach the ceiling.

Hidden door frame

Hide your door in the wall with the hidden door frame. Also available without a top beam.

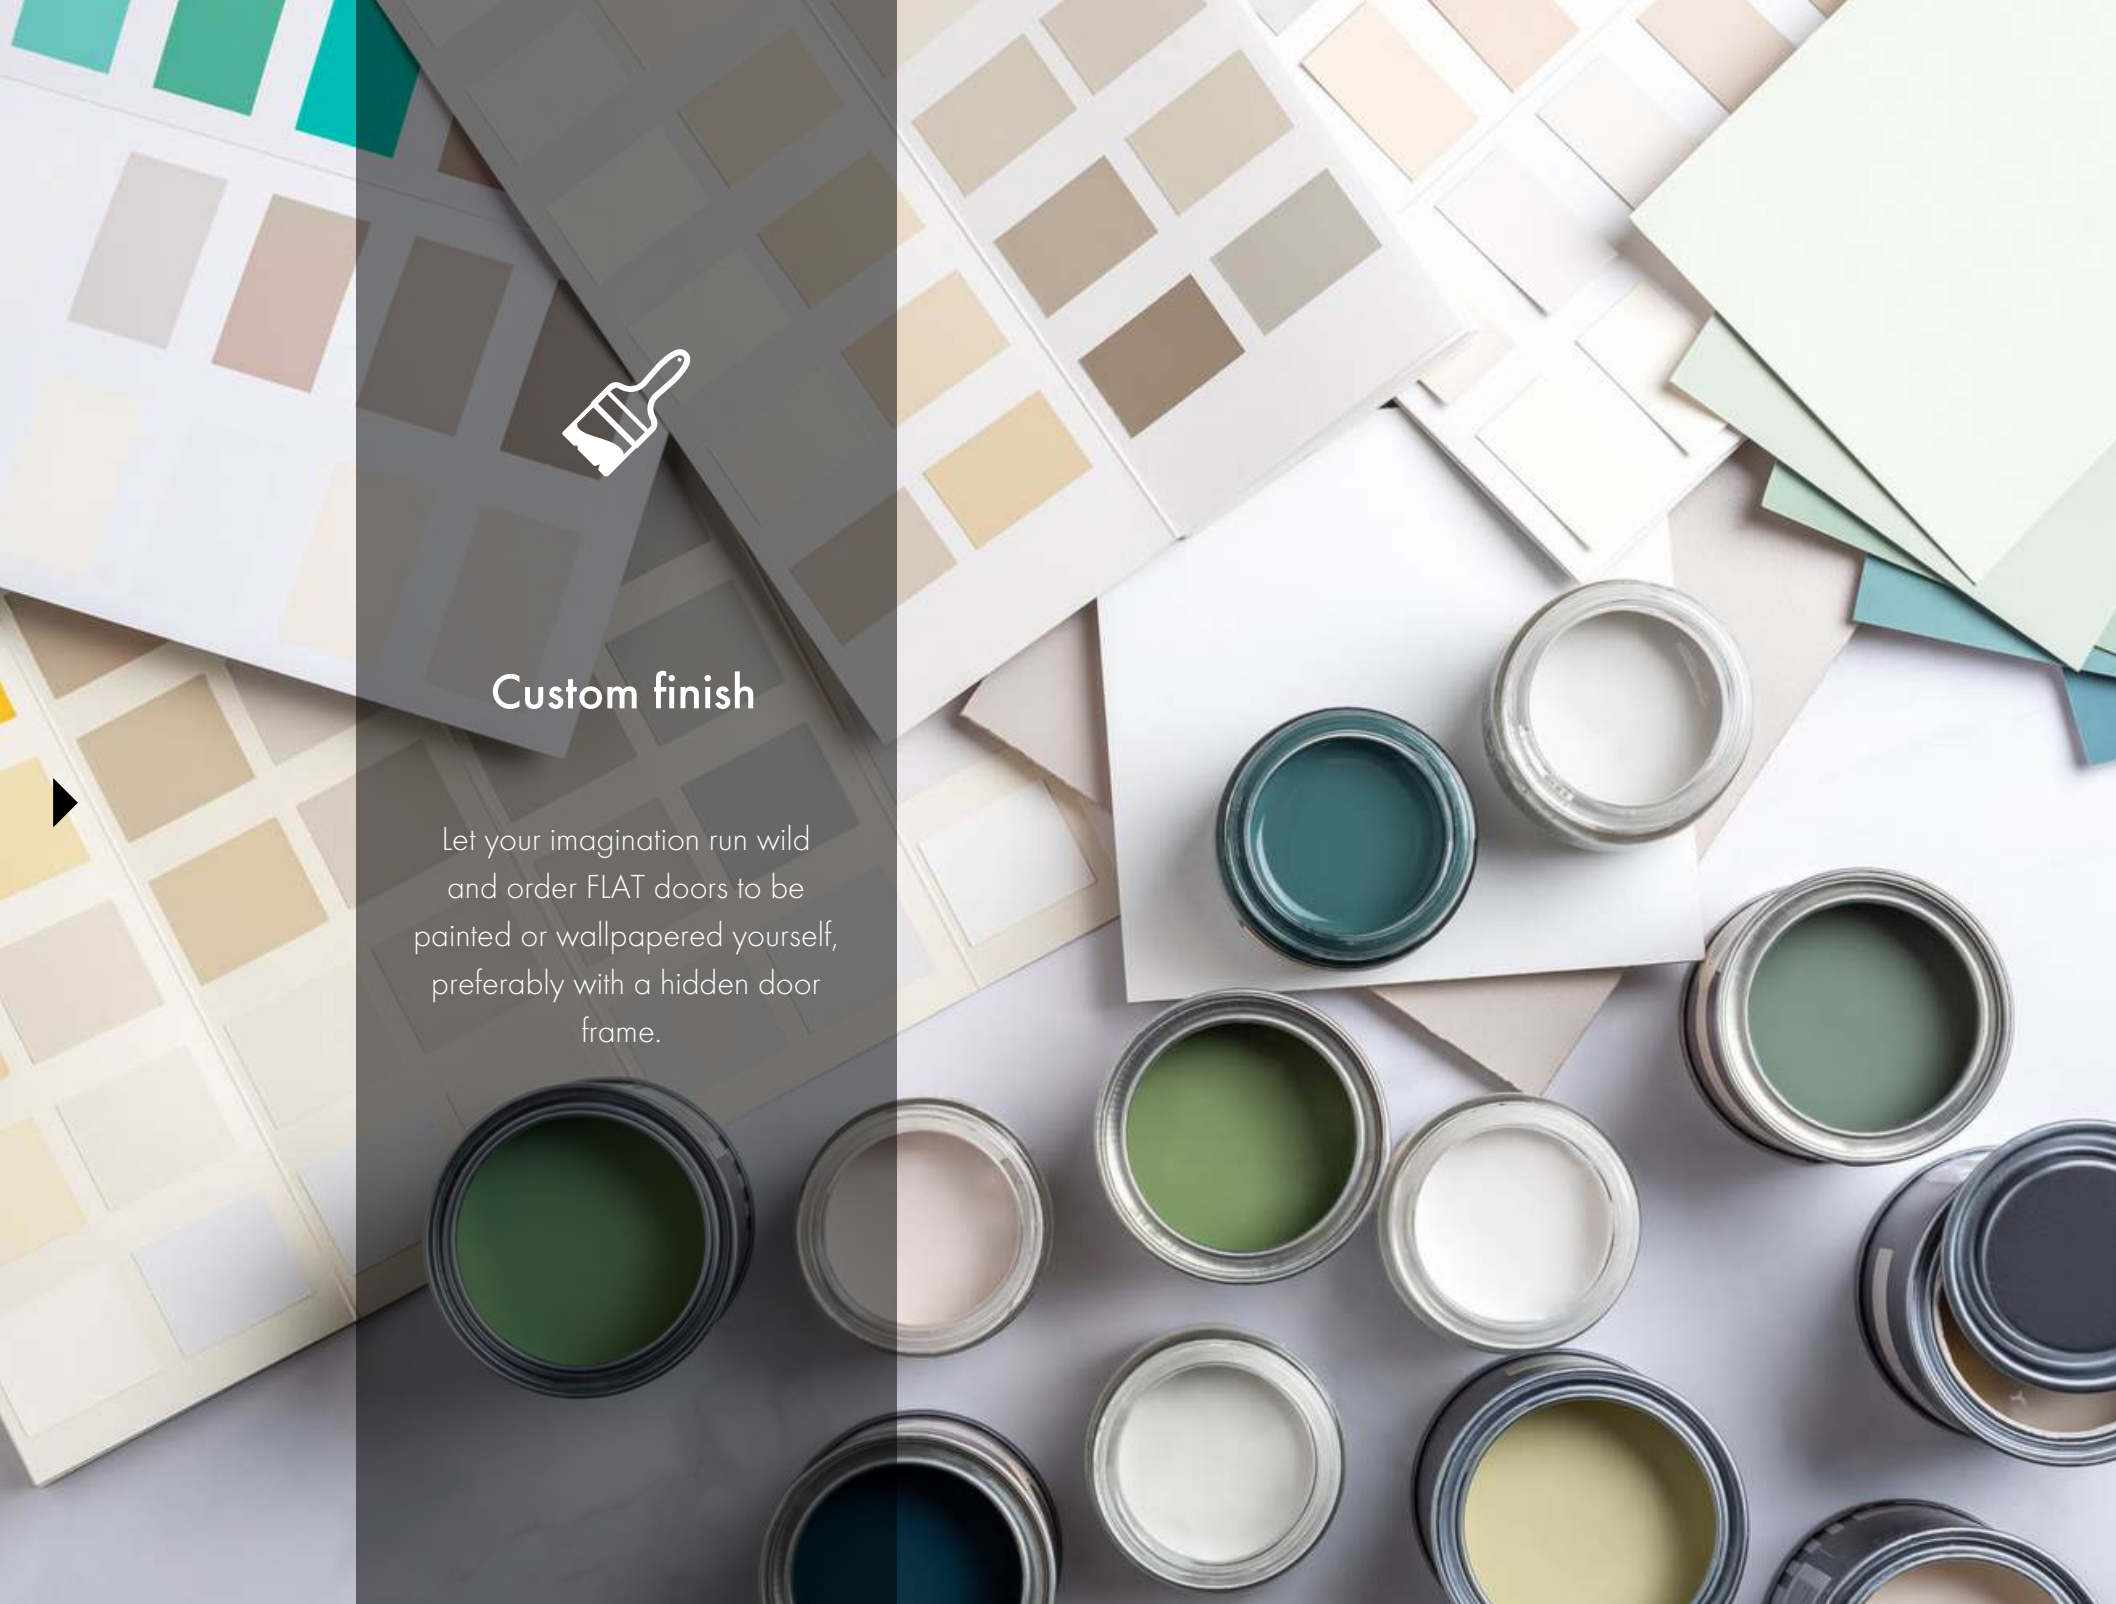

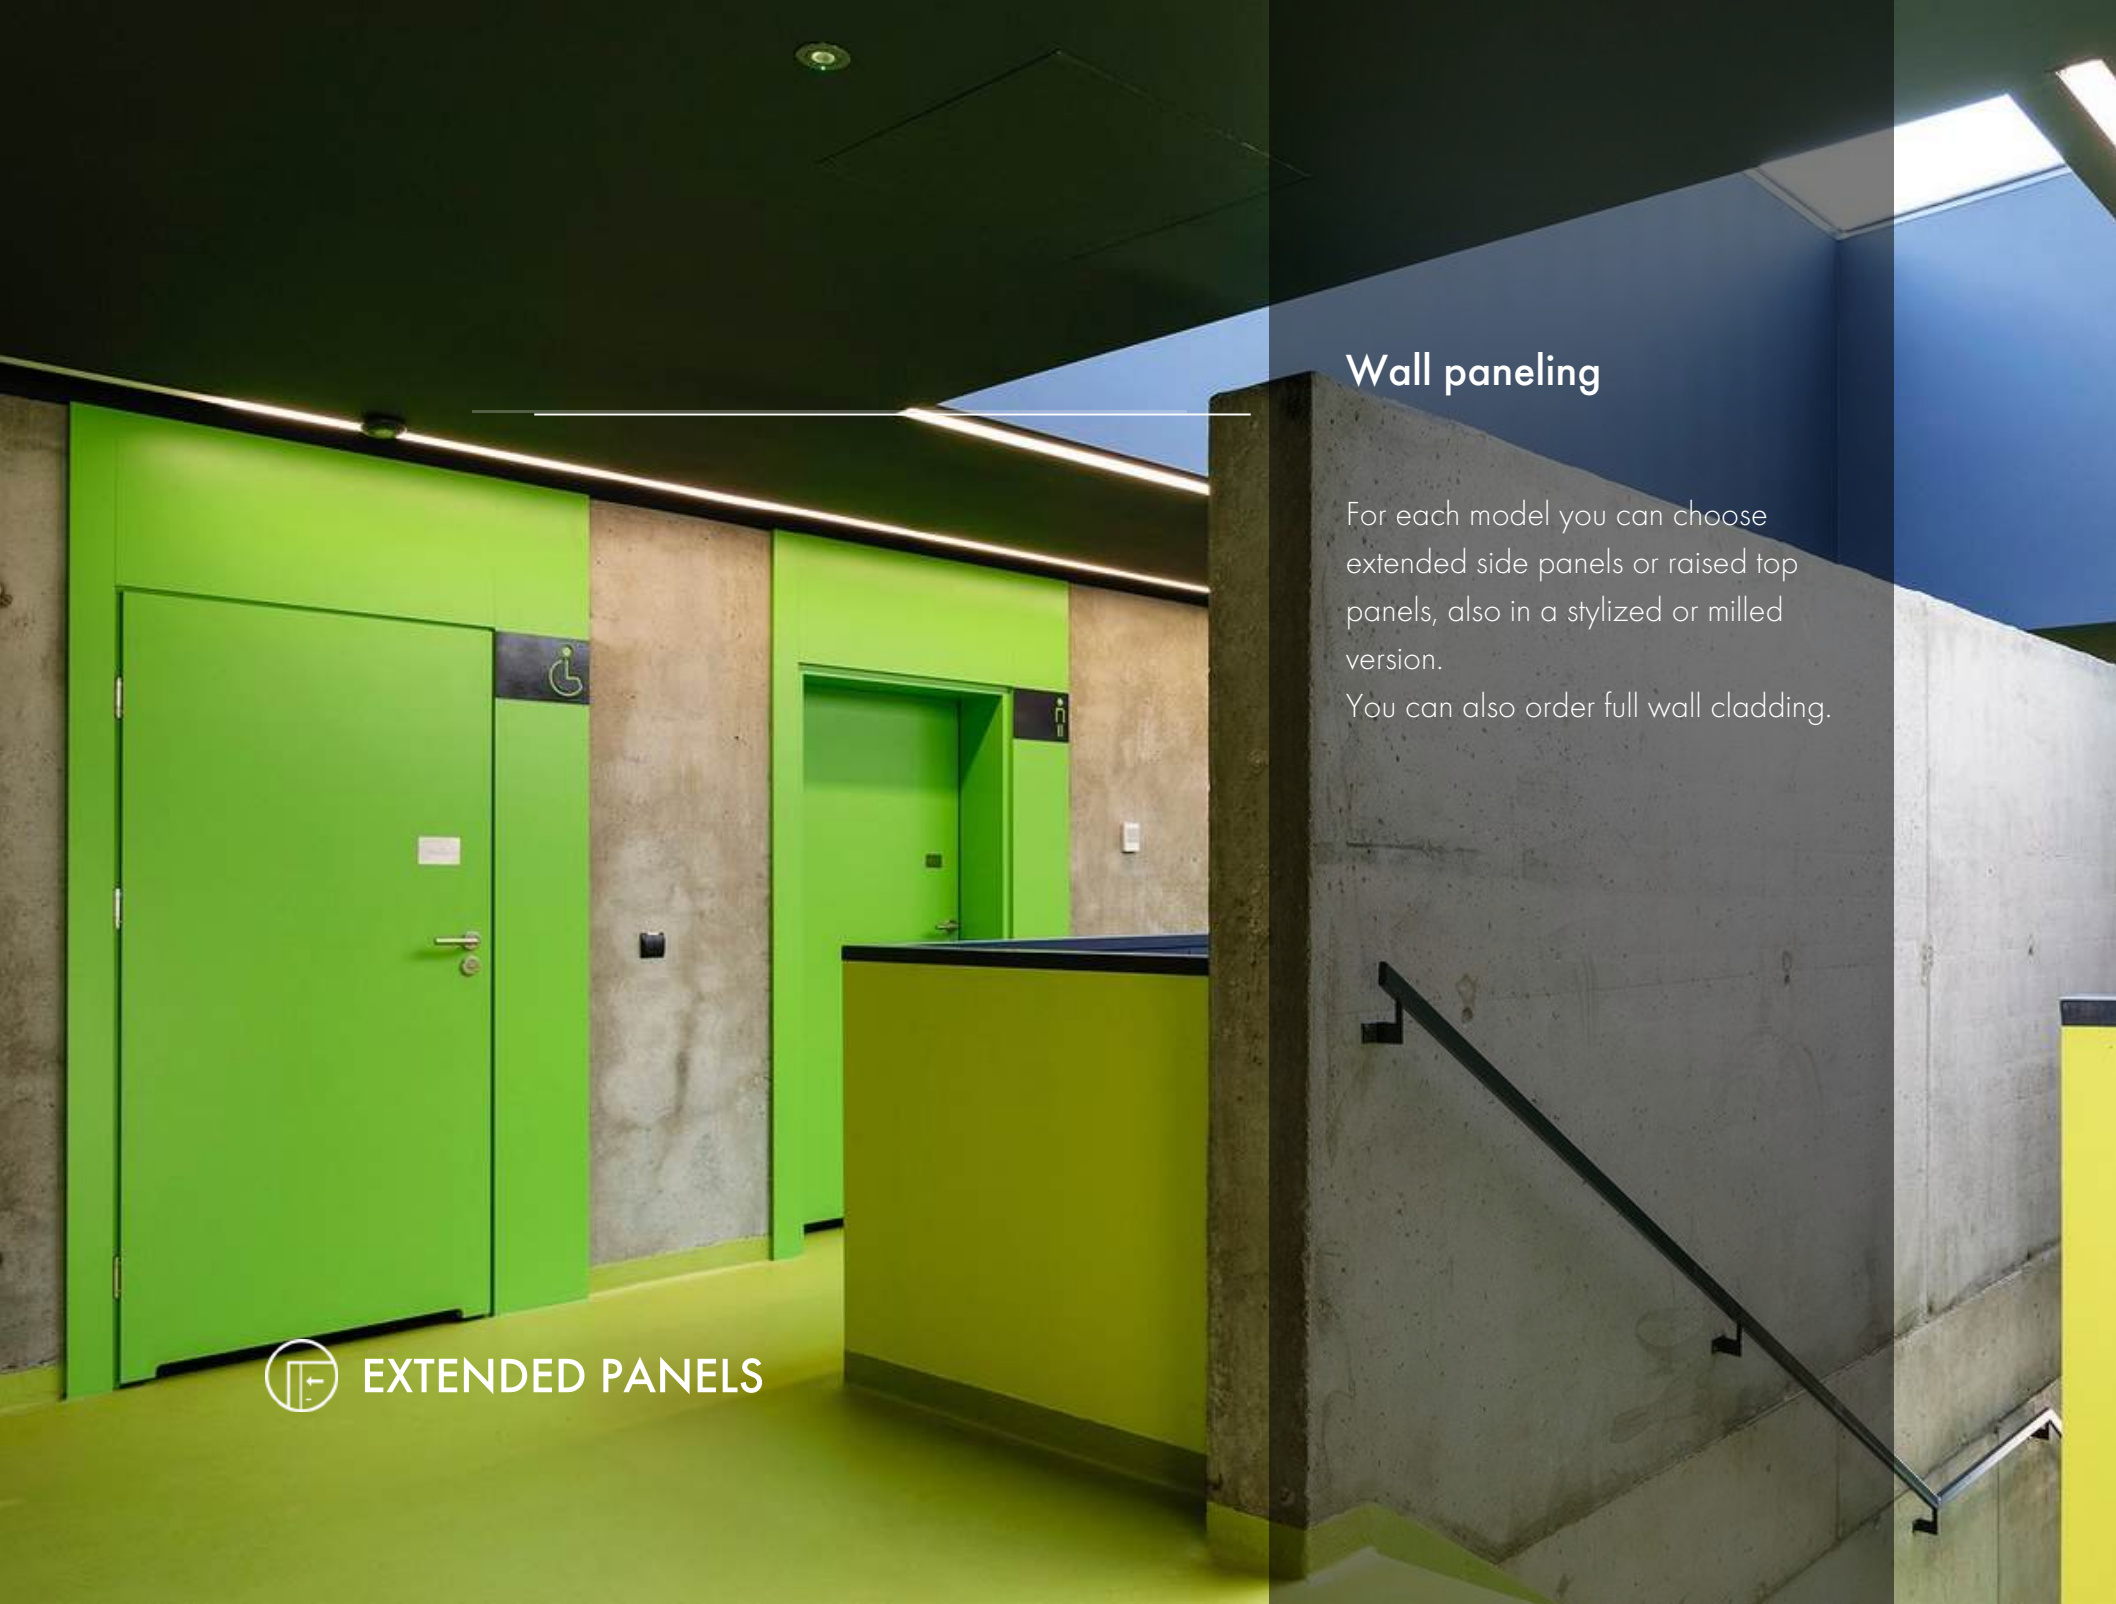

HIDDEN IN THE WALL

Custom finish

Let your imagination run wild and order FLAT doors to be painted or wallpapered yourself, preferably with a hidden door frame.

Wall paneling

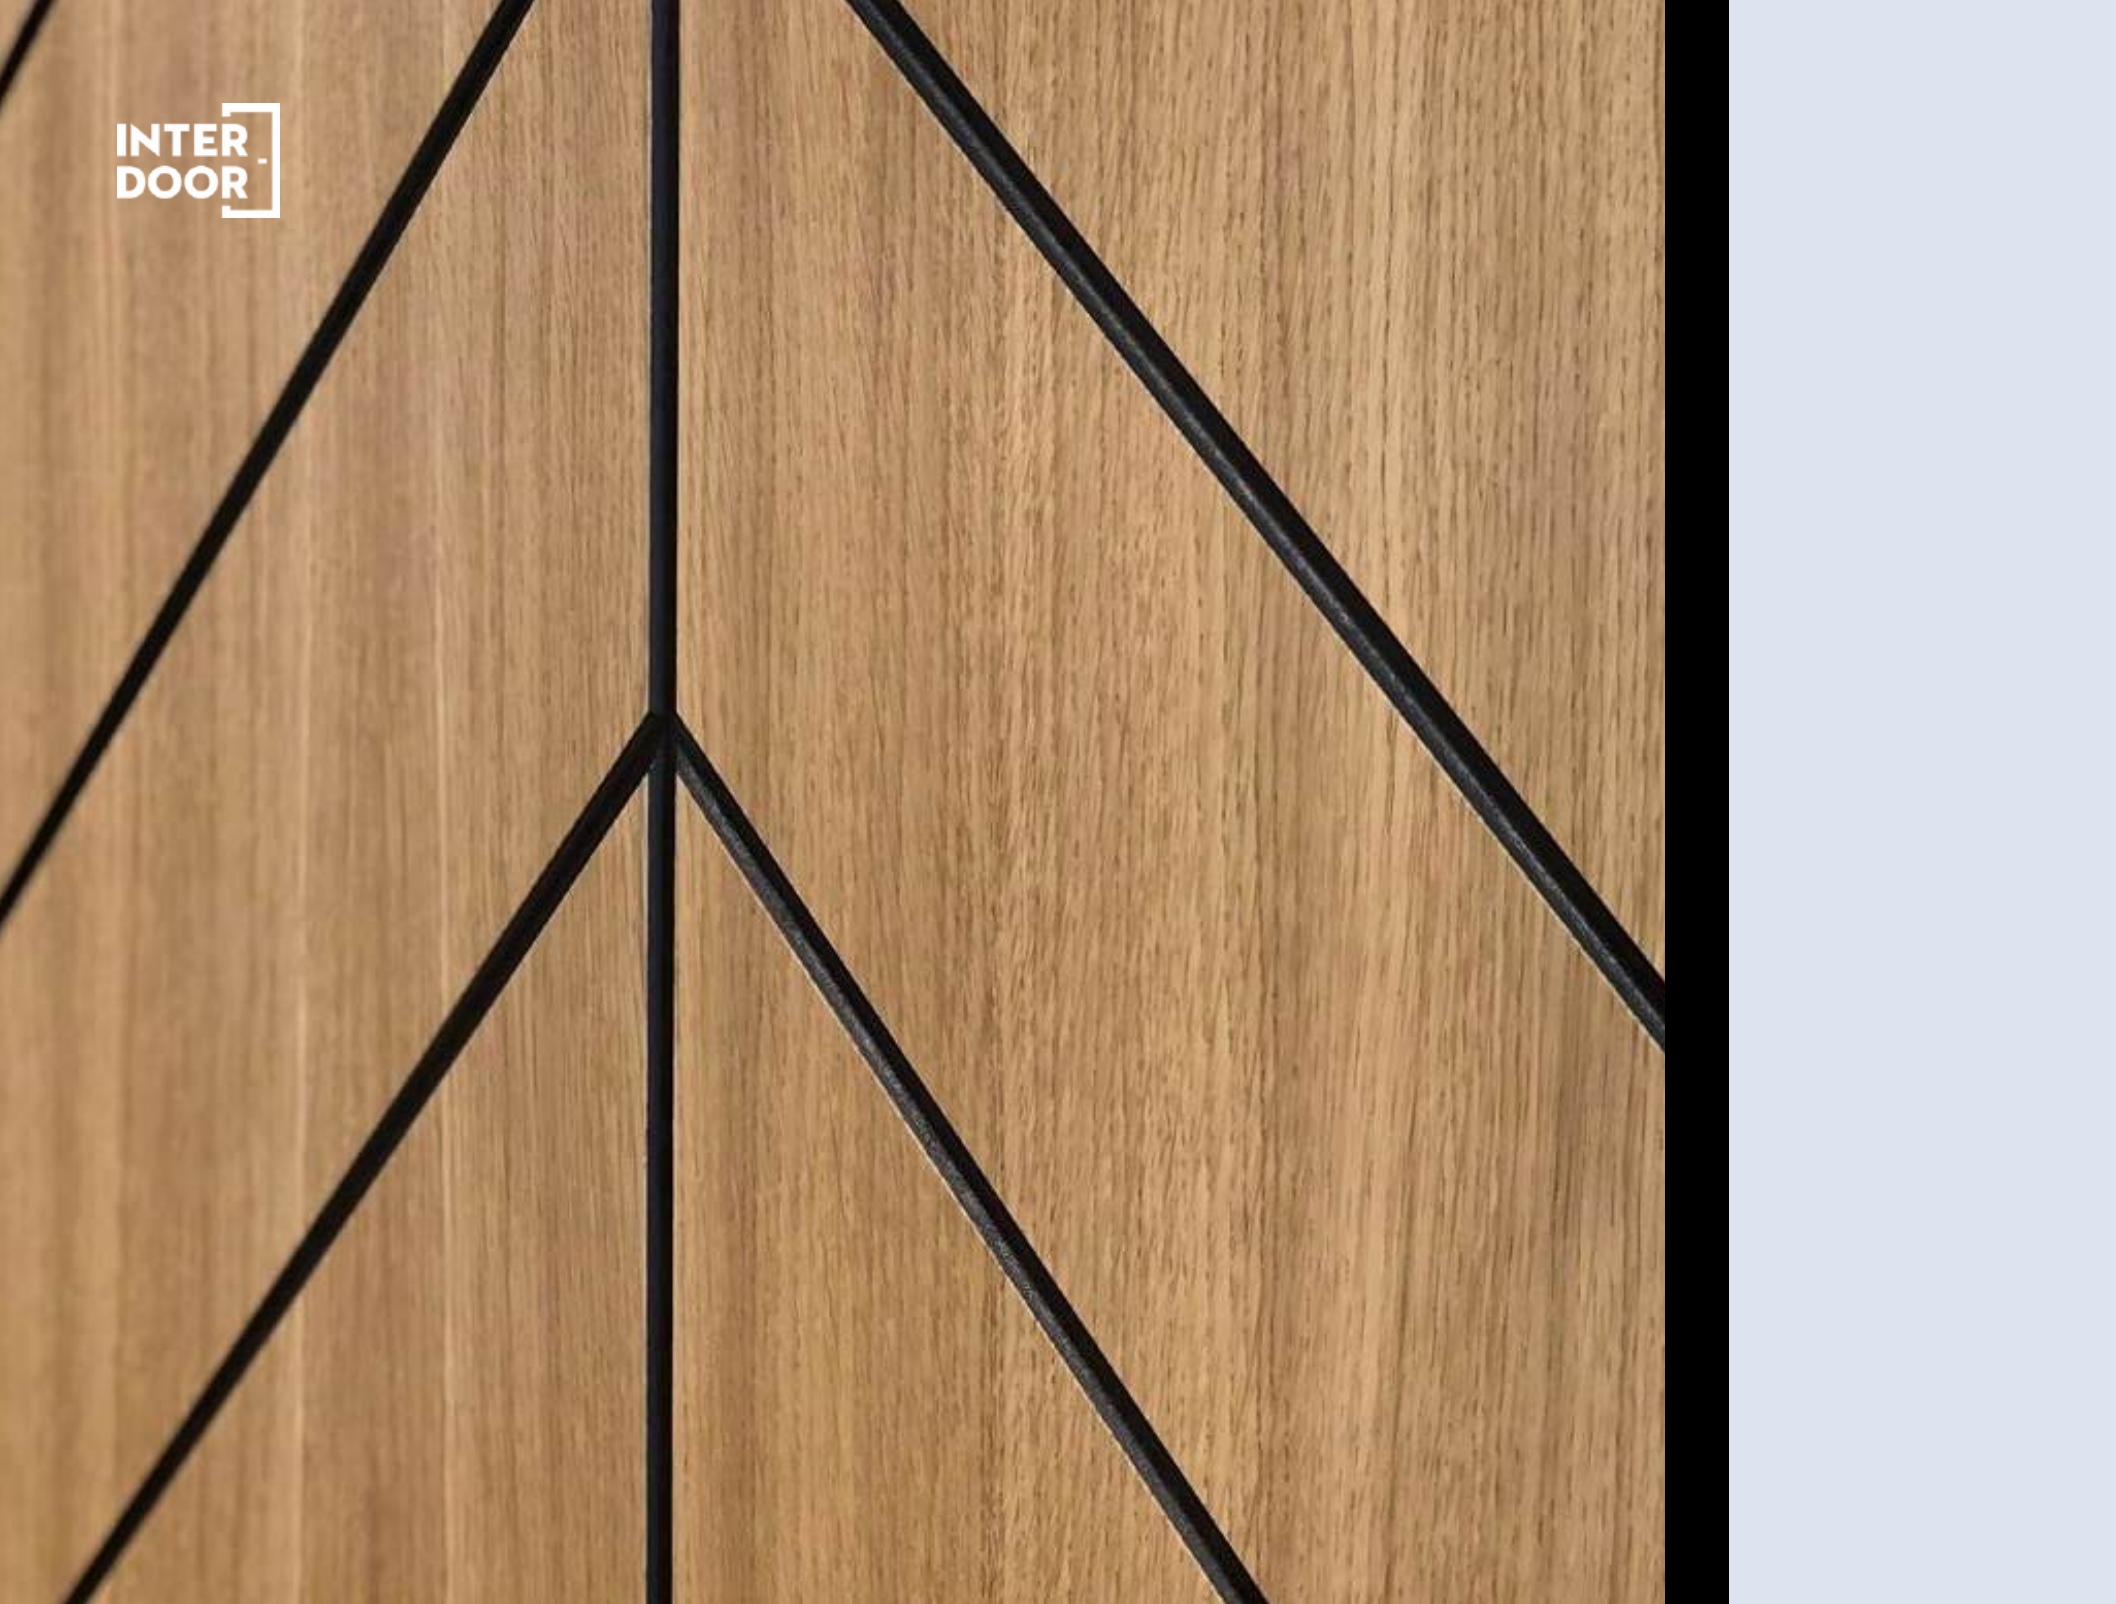

For each model you can choose extended side panels or raised top panels, also in a stylized or milled version.

You can also order full wall cladding.

The ALBA FREZ doors will appeal to people who like minimalist forms. These models do not have inlays - the only decorations here are the milling and that is where the greatest charm lies. They will ideally find their place in modern, minimalist interiors. We have several types of milling to choose from, from 1 to 4 lines.

ALBA NATURA is a sophisticated combination of modern styling with the charm of natural veneer. Our designers wanted to achieve subtle contrast.

It is the result of combining in one model vertically oriented patterns, distributed over the entire leaf, with two narrow stripes on which the pattern is arranged transversely.

For those who prefer minimalist forms, we have stripes in the same finish as the entire leaf. For customers looking for slightly bolder accents, we offer versions using two completely different colors. An interesting fact is that in this model, the horizontal stripes can be extended further, so that they are on widened bands.

The BARI collection stands out for its tasteful combination of natural wood with modern, unique patterns. The models from this collection delight us with their universal simplicity and interesting design.

Interesting millings (BARI 4/5/6/7/8) or unusual finishing arrangements (NATURA BARI 1/2/3) add freshness to them. Thanks to this, BARI doors meet the expectations of people looking for original designs and unconventional details.

FRESA is an elegant model, inspired by the style of chic tenement houses.

Although it was created to emphasize the character of apartments with soul, it is much more universal.

Thanks to the appropriate combination of milling and frame, it surprises with its visual lightness - perfectly fitting into the atmosphere of both classic and modern interiors.

If you want to emphasize the uniqueness of your interior even more, choose accessories such as a decorative crown, RETRO door frame and a decorative door handle.

NOISE REDUCTION

The name RONDO refers to an innovative way of closing rooms, based on a sliding-rotating motion.

This solution greatly improves accessibility, which is especially important for people with disabilities. When the door leaf is open at a 90-degree angle, it takes up significantly less space than standard doors, providing additional opportunities for space arrangement.

RONDO

The RONDO system works with the following doors: ALBA, BARI, CAPRI, CLASSIC full, LOGGIA, FLAT full, VITA full.

GLASS DOORS are the perfect solution for letting more light into your space, making them ideal for offices or bathrooms.

Our range includes models with tempered glass panels in clear, satin, sandblasted, antisol, and laminated finishes. The panels are also available in the OPTI WHITE version, featuring colorless edges and exceptional clarity (free of the greenish tint).

Glass doors can be ordered in single or double-leaf versions.
